### Newly-Developed Load Binders Used With Chain Tie Downs Standard Released

The Web Sling & Tie Down Association (WSTDA) is pleased to announce the recent publication of its newly-developed *Recommended Standard Specification for Load Binders Used With Chain Tie Downs (WSTDA-T-6)*. The standard applies to load binders designed to accommodate chain tie downs for the purpose of securing cargo. This standard recommends construction as well as identification and marking of these load binders. In addition, it gives important practical advice on use, maintenance and inspection of these binders.

The Web Sling & Tie Down Association (WSTDA) is a non-profit, technical association dedicated to the development and promotion of voluntary recommended standards and associated reference materials. Members of the WSTDA include manufacturers and suppliers of synthetic web slings and tie downs, polyester roundslings, synthetic webbing, fibers, thread and related components.

For more information, contact WSTDA at (443) 640-1070 or [www.wstda.com](http://www.wstda.com)

To order a copy of the T-6 Standard, go to <http://www.wstda.com/products/index.cfm>
